1. The following table summarizes the results of the study. The first column lists the variables, the second column lists the descriptive statistics, and the third column lists the regression coefficients.

— 1 —

“The first time I saw him, he was wearing a tattered jacket and a torn shirt. He had a look of exhaustion and despair on his face. I asked him if he wanted to come inside and have a meal. He hesitated, then nodded. I invited him in and offered him some food. He accepted it gratefully. As we sat down to eat, I noticed that he was shaking uncontrollably. I asked him if he was cold, and he responded that he had been sleeping outside in the cold for several days. I asked him if he had a place to stay, and he replied that he had nowhere to go. I asked him if he wanted to come back to my house and stay there for a few days until he could find a place to live. He thought about it for a moment, then nodded again. I told him that I would take care of him and make sure he had a safe place to stay. He thanked me and said that he would never forget my kindness. From that day on, he became a regular visitor to my house, and we became close friends. He eventually found a place to live and got a job, but he always came back to my house for a meal and a conversation. I will never forget the day I met him, and the kindness that changed his life.”

“The first step in the right direction is to make the public aware of the problem.”
